

SuperFlex Universal:

Hot rod & Kit car products

SF1276 Range

The SF1276 is of tried and trusted TVR Chimera & Griffith wishbone origin. It has in the past, and still is being applied to kit car manufacture. This is our medium sized option, and proven capable of offering performance & durability when fitted to powerful V8 & V10 engined sports cars

An assembly lubricant sachet is included: One for every eight assemblies.
