

## SuperFlex Universal:

### Hot rod & Kit car products

#### SF2043 Range

The SF2043 Range has been made in response to feedback from kit car enthusiasts who are dissatisfied with the outdated cheap, hard injection moulded versions, which lack the resilience of our poured and oven cured brand.

Furthermore the cheap versions do not use a stainless steel crush tube. SuperFlex now offer this quality alternative.

An assembly lubricant sachet is included: One for every four assemblies.

Part Ref	Description	Notes
SF2043P-**	Polyurethane 1 1/8" OD Top Hat Bush Only e.g. 80 shore would be SPF2043P-80	Flange is 4.5mm thick x 35.25mm OD
